EDUCATION

Bachelor of Science (Information Technology)

Veer Narmad South Gujarat University

06/2023 - Present

CLASS 12TH

M.T Jariwala High School

06/2022 - 03/2023

Percentage: 91.46%

CLASS 10TH

M.T Jariwala High School

06/2020 - 05/2021

Percentage: 92.16%

INTERNSHIP

Data Analysis Intern

WellTrade Surgipharma Pvt Ltd

12/2025 - 04/2026

Tasks/Achievements

- Cleaned and processed pharmaceutical business datasets in Excel to ensure data accuracy.
- Designed interactive dashboards to visualize sales and purchase trends.
- Built a Python-based web interface for real-time data visualization and reporting.
- Converted complex raw data into clear KPI summaries and trend reports.
- Supported management in data-driven decision-making through insights.
- Performed data validation and preprocessing to maintain data quality.
- Presented findings in a structured and understandable format for stakeholders.

CERTIFICATES

Tata – Cybersecurity Analyst Job Simulation
(03/2026 - 04/2026)

Forage

Ethical Hacker (02/2026 - 03/2026)

CISCO

Deloitte Australia – Cyber Job Simulation (11/2025 - 12/2025)

Forage

PERSONAL PROJECTS

Data and Predictive Analysis for Pharma Business
(12/2025 - 04/2026)

- Developed a full-stack analytics dashboard using Python Flask, Pandas, and Chart.js.
- Processed and analyzed real-world sales and purchase data to generate insights.
- Implemented data cleaning, aggregation, and filtering mechanisms for accurate analysis.
- Designed interactive dashboards for sales, purchases, and comparative analysis.
- Built predictive models using linear regression to forecast future business trends.
- Implemented secure authentication and user access control.
- Managed database operations using SQLite for efficient data storage and retrieval.

Network Vulnerability Scanner (01/2026 - 03/2026)

- Developed a Python-based tool to scan local network hosts for security analysis.
- Implemented port scanning techniques to identify open ports and running services.
- Integrated CVE database lookup to detect known vulnerabilities.
- Automated the network scanning process to improve efficiency and accuracy.
- Identified potential security risks and system weaknesses.
- Generated reports on vulnerabilities and network status.
- Contributed to improving network security and risk assessment processes.

Secure Login System (10/2025 - 01/2026)

- Developed a secure login system using Python and Flask with database integration.
- Implemented password hashing using bcrypt for secure credential storage.
- Designed authentication workflows with session management.
- Applied security measures to prevent unauthorized access and brute-force attacks.
- Integrated user authentication and access control mechanisms.
- Ensured secure handling of user data and login processes.
- Tested and improved the system for reliability and security compliance.
